

The Hydrogen stakeholders in France

April 2026

ABOUT US

France Hydrogène is the leading association for the hydrogen sector in France. It brings together all stakeholders in the industry: manufacturers, researchers, regional representatives, competitiveness clusters, and partner federations. Together, we support the deployment of hydrogen as a lever for decarbonization, reindustrialization, and sovereignty for France and Europe.

OUR MISSIONS

Structure, promote, and accelerate the development of the hydrogen sector in France and internationally

We act to:

- Represent all players in the hydrogen sector,
- Raise awareness of the challenges and promote solutions in the hydrogen sector,
- Centralize and provide benchmark expertise,
- Facilitate the deployment of hydrogen in different regions,
- Promote the French hydrogen sector in Europe and internationally.

With 15 regional Delegations, France Hydrogène supports the sector at the local level.

OUR SERVICES

We represent you

As a key partner for public authorities, France Hydrogène works to convince politicians and the general public of the benefits of deploying hydrogen, maintaining close relationships with a network of influential stakeholders (partner professional federations and the press). Members participate in developing the positions defended by the association. Internationally, the association also plays an active role in economic diplomacy and works to position the French industry in a dynamic global market.

We inform you

As a member, you will have access to our working groups, spaces for sharing expertise and feedback on cross-cutting themes or strategic markets, enabling you to identify trends.

You will receive our weekly newsletters covering industry, institutional and international news.

You will have access to reference publications from our consolidated and regularly updated databases: key figures, maps, analyses and technical notes, presentations of reports and studies, etc.

Offering you visibility

Thanks to its online tools, France Hydrogène promotes its members through its directory on Vig'Hy, the Hydrogen Observatory, as well as through the new Panorama des solutions, an online catalogue of solutions in the sector that will soon be launched.

We connect you

By participating in our regional delegations, you will exchange ideas with your peers on best practices to facilitate project deployment and ecosystem structuring in the regions, as close as possible to the field.

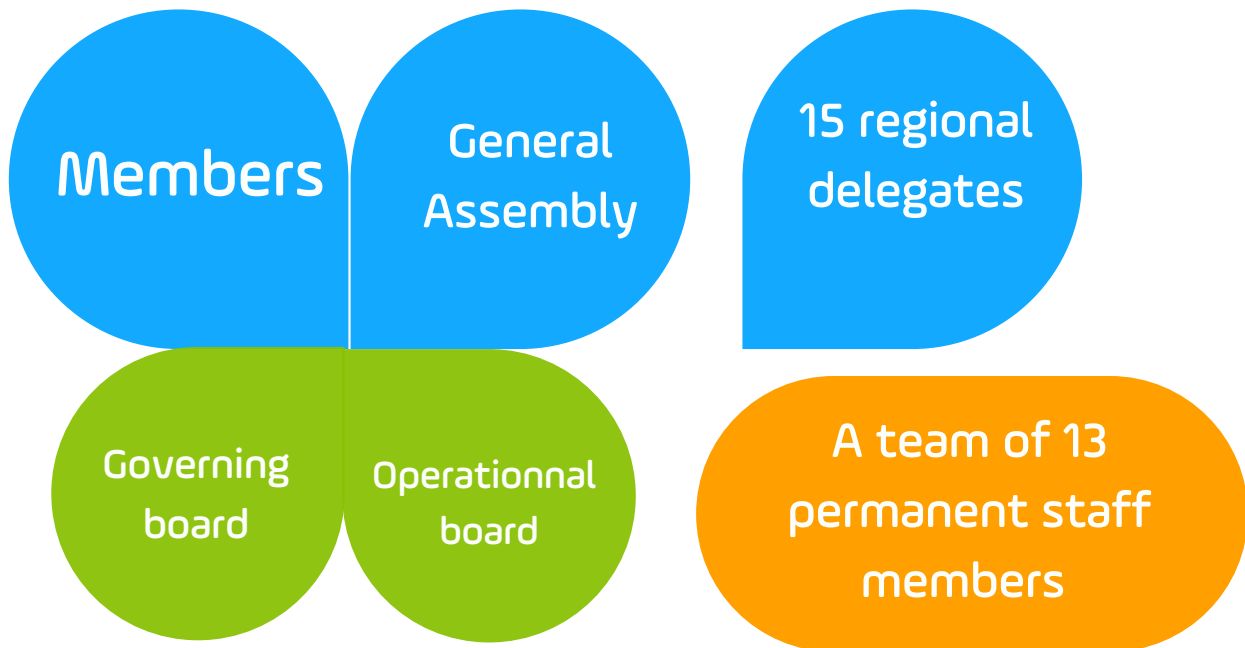

France Hydrogène also offers its members preferential terms or benefits at several strategic industry events, such as the Hyvolution trade show, of which the association has been a privileged partner since its creation 10 years ago.

Our Working groups

- **WG Regulation & standards / Safety**
- **SteerCo Mobility on road**
- **SteerCo E-fuels**
- **SteerCo Industry-Energy (market segment analysis) / GT Flexibility**
- **WG institutionnal relations & thematic Task forces**
- **WG International affairs**
- **WG Territories / WG Régions / WG ZNI**

OUR ORGANISATION

your representatives and contacts

IN BRIEF: WHY JOIN ?

- **Make your voice heard:** take part in building a vision for the sector and be represented in national and European bodies
- **Gain visibility:** show your commitment to developing an industrial sector of excellence that creates value in France
- **Save time:** access qualified, reliable and regular information
- **Develop your network:** meet potential partners at our meetings and events

**France Hydrogène, a committed collective
serving a strategic industrial sector**

UNITE, ACCELERATE, TRANSFORM
